Profile

Computer Science graduate and Growth Associate Intern with hands-on experience taking products from user research and problem discovery to MVP development, testing, and iteration. Combines technical execution across React, Next.js, Node.js and Supabase with product thinking, user research, growth, and early-stage business experimentation.

Experience

Growth Associate Intern **Jul 2026 – Present**
NxtWave *Hyderabad, Telangana*

- Drove product growth and development for NIAT Insider, identifying user, engagement, UX, and discoverability gaps and proposing and executing improvements across onboarding, product experience, and feature development with manager oversight.
- Interviewed 15 NIAT student presidents to understand adoption barriers and cross-campus needs; used the research to prioritize a Q&A experience over a broader student-networking concept, balancing engagement potential with search/discovery value.
- Designed and shipped a Q&A MVP covering student answer submission, admin moderation, SEO review, approval, and publishing; piloted the workflow with 15 students to test cross-campus knowledge sharing and engagement.
- Used AI as an execution multiplier, combining ChatGPT/LLMs with research, debugging, implementation, documentation, and rapid prototyping to learn unfamiliar problems quickly and turn insights into shipped solutions.
- Redesigned key product surfaces and UX, using Figma/Stitch and user feedback to improve information architecture and the student discovery experience; worked cross-functionally with Product, Engineering, CRM, Content, Branding, SEO, and Operations teams to execute changes.

Founding Team Member **Nov 2025 – Jan 2026**
Obzient *Hyderabad, Telangana*

- Identified operational gaps in a real-estate broker's Excel-based workflow, including fragmented tenant records, manual payment follow-ups, and dependence on sales staff to resolve tenant issues; translated these problems into requirements for a centralized application.
- Designed and developed the application end-to-end, implementing tenant data management, monthly payment notifications, and issue-management workflows; approximately 200 tenant records were added to the system for real-world use.
- Changed the tenant-support workflow from sales-mediated communication to direct ticket raising, allowing tenants to report issues directly through the application; validated the workflow with the broker and 2 sales representatives and iterated based on feedback.

Founder's Office — GTM & Growth Advisor **2024**
InfluenceHut *Hyderabad*

- Advised founder on brand positioning and go-to-market strategy for influencer campaigns; contributed to key early-stage decisions through data-backed audience targeting insights.
- Researched Telugu influencers and identified a gap between regional creators and companies seeking targeted promotions; contributed to an agency model matching brands with influencers based on niche, audience, and campaign requirements.

Digital Marketing Intern **Nov 2023 – June 2024**
HashPro Academy *Hyderabad*

- Conducted research on student behavior, retention, pricing, and potential office locations, while contributing ideas for content, marketing strategies, and student engagement.
- Interacted directly with students during bootcamps, gathering observations and communicating course value to support student engagement and retention.

Projects

Attendance Management System | *React, Supabase, PostgreSQL, TypeScript* | GitHub

- Identified the operational friction of hardware/fingerprint-based attendance systems and built an MVP enabling work-from-office attendance through location and IP verification, with a 50-meter office geofence.
- Piloted the workflow with 2 users, gathered feedback from real usage, and iterated on the attendance and verification flow.

Employee Management System | *Spring Boot, MySQL, REST APIs, Maven*

- Developed a RESTful application with full CRUD functionality using Controller–Service–Repository layered architecture; tested APIs with Postman.

Skills

Product & Business: Product Discovery · Problem Definition · MVP Development · Feature Prioritization · User Feedback · Product Analytics · Growth Experiments · GTM
Technology & AI: React · Node.js · REST APIs · Supabase · PostgreSQL ·Java · AI-assisted Development · SQL · Authentication

Education

Keshav Memorial Institute of Technology **2023 – 2026**
B.Tech in Computer Science Engineering | CGPA: 8.3 *Hyderabad, Telangana*
Indure Institute of Engineering and Technology **2020 – 2023**
Diploma in Computer Science Engineering | CGPA: 8.3 *Siddipet, Telangana*

Leadership / Recognition

Art of Influence Program — Evolving Enthusiast Recognition **2024**

- Recognized for participation and demonstrated communication, leadership, critical-thinking, and structured problem-solving skills.

Deloitte Australia — Data Analytics Job Simulation — Forage
